

TRACING® SPORT

Line marking paint designed for multisport grass sport fields

Reference	151800SPO	151801SPO	151802SPO	151803SPO	151804SPO	151805SPO
Colour	White	Blue	Yellow	Black	Red	Green

Description

TRACING® SPORT is a line marker used for marking grassed sports fields.

Its special formulation preserves the grass and gives it high covering power and great weather resistance.

General conditions

- ❖ Do not expose to temperatures above 50°C
- ❖ Keep away from sources of ignition, heat and sunlight
- ❖ Do not smoke
- ❖ Do not pierce even after use the aerosol
- ❖ Do not burn even after use the aerosol
- ❖ Safety data sheets are available free of charge on our website www.technimafrance.com

Instructions for use

1. Before each use, shake the aerosol well (even after hearing the beads clearly).
2. Position the aerosol upside down in the trolley, adjust its height, in order to make lines at the desired width (line width between 5 and 12cm)
3. After use, remove the aerosol from the cart, place it in the "head up" position and purge it for 2 seconds to clean the valve and diffuser.

Application

For quality line marking, the TRACING® SPORT aerosol can be used with our sports trolley (ref 441610) specially designed for marking grassed areas:

- 4 air wheels and a rigid chassis for greater stability
- Positioning of the aerosol adjustable in height for the realization of width of lines between 5 and 12 cm wide
- Additional storage of 6 aerosols
- Wind protection, for clear and precise markings
- Accessories for marking straight lines and circles (reel line and posts)

Notes: Use up to 5°C. Below this temperature, the quality of the spray may be affected by the drop in pressure generated in the aerosol (without this causing paint degradation).

- For an optimal holding of TRACING® SPORT, it is recommended to mark on dry grass.
- It is however possible to apply on wet grass. The marking will not lose in visibility but its holding in time will be decreased

End of life: Recycle or dispose of in accordance with current legislation, preferably by an approved collector or company.

Specifications

- ❖ Packaging : 1 box of 12 products
- ❖ Contents : 750ml NET
- ❖ Binder : Acrylic
- ❖ Pigments : mineral and organic, lead and cadmium-free
- ❖ Solvents : A complex blend free from chlorinated solvents and aromatic compounds
- ❖ Marking duration: 2 to 4 weeks on grassed fields, depending on weather conditions
- ❖ Finish : Matt
- ❖ Drying time : 15 to 20 minutes at 20°C
- ❖ Store aerosols between 15 and 25°C, **away from moisture.**
- ❖ Technical warranty: Storage life before use of 4 years
- ❖ TRACING® SPORT aerosols are frost-proof. However, due to the sharp pressure drop this generates in aerosols, the functionality and quality of the spray may be significantly impaired. It is therefore always recommended to store these aerosols at room temperature before use.

Autonomy	For a 10cm wide line
	110 meters of lines (slow passage for optimal coverage)
	160 meters of lines (Rapid application)
	Example: To trace a football field (total of 600 to 700 meters, a width of 10/12 cm) 5 to 7 aerosols of TRACING SPORT are necessary for the first marking (slow passage), then 4 aerosols are sufficient for periodic maintenance of the marking (rapid passage every 2 to 4 weeks)
